Please briefly describe the main reason why you have given the score above

		Response total
	Responses	
	I don't feel that they are currently meeting expectations.	
	Useful source of information and coordinating relevant stakeholders to improve activity options in the county.	
	Friendly and approachable and collaborative attitude	
	Active Oxfordshire are proactive, efficient and extremely good at their jobs! They are wonderful to work with and I have always found them to be a very supportive partner. They have a keen interest in mental health, and really understand the barriers that people face that make becoming active difficult for some people.	
	Do less activity delivery so not relevant to all friends/colleagues.	
	Opportunities in sport that is created for young pupils in Oxford city area. Also given opportunities for students to do further training in different sports	
	Useful for contacts. Good to be part of a network in the county. Invites to events.	
	It has taken a while to understand Active Oxfordshire's position within sport in Oxfordshire. It is not automatically clear that it is the 'go to' entity and it has taken a while to join the dots with others. I did not think the workshops at the conference were especially helpful. Since working with Active Oxfordshire and delivering projects for them I can see how they operate. My fear is that much of their work and grant funding is focused on areas of social deprivation and not always where the greatest and longest term impact can be achieved.	
	Well placed within the county with a knowledgeable team providing a range of expertise and support.	
	The support tht we have had from Josh and Steph has been quite incredible. They understand the iportance of supporting trainee teachers whilst training rather than leaving it to late as teachers. We hav to capture ans inspie them and I do not know of anyone esle supporting this other than the forward thinking of Actove Oxfordshire and thank you.	
	I am happy with the service they provide and the opportunities they are able to signpost people too.	
	Active Oxfordshire has an experienced team and has established a strong local network of key stakeholders to increase activity to improve health and wellbeing. We have worked with Active Oxfordshire and its predessor or nearly 6 years	
	It's working well collaboratively with a range of stakeholders, to deliver a comprehensive offer of physical activity options to improve participation across a wide spectrum of the population.	
	Active Oxfordshire are a small but dedicated team with a clear focus and a can do approach	
	I have found Active Oxfordshire to be great at networking, facilitating and getting buy in around a common goal.	
	I think it is essential in the Early Years sector to work collaboratively to ensure children are school ready and help children to become life-long learners.	
	Outside of the workplace I'm not sure what I would be recommending...	
	Active Oxfordshire have been extremely influential and supportive in enabling us to increase our physical activity provision across the Cherwell District. Active Oxfordshire have helped on many levels from creating and forming partnerships which has not only enabled increased opportunities but has also offered new provision in targeted areas with AO providing insight to support delivery. Active Oxfordshire have also played a key role in supporting to bring significant additional funding into the district increasing provision offered in new areas such as specific health inequalities, troubled families and more. AO have also been an excellent advocate and champion for the programmes and impact we as a service are having.

**Can you tell us a story that describes why you feel this way?**

	Responses	Response total
	<p>I have been working with Active Oxfordshire along with other key organisations to improve the exercise referral pathway in Oxfordshire and feel we have made excellent progress with refreshing and renewing the scheme so far.</p> <p>Sometimes difficult to understand exactly what/where our contributions have been part of the impact made.</p> <p>Please see the previous message.</p> <p>The competitions that I run or encourage at level 1 &amp; 2 are part of the school games programme. The level 2 competition progress through to level 3. I believe that I support level 3 individually and with leaders and this has a positive impact on those that are competitors or leaders.</p> <p>Get Physical - aimed at clinicians and then employers - events developed and sponsored by the CSPs and Oxford AHSN with large employers. More recently - involved in local leadership group brought together by AO</p> <p>Participating in group discussions, I felt that my ideas were listened to and incorporated into the vision going forwards.</p> <p>Our work with Active Oxfordshire's to tackle physical inactivity as part of a whole system is the right approach but much more difficult at a time when key partners, such as schools, have major resource issues and national policies such as transport and spatial planning have many conflicting priorities, such as the free movement of motorised traffic, that take precedence above health and wellbeing needs.</p> <p>as per before hand: clear and open discussion around a common goal (ex ref pilot)</p> <p>It is really encouraging that Early Years is included in the work that Active Oxfordshire does. Early identification and support across the county is essential.</p> <p>We work closely as districts together on a single goal - to get people with Diabetes active or more active. We meet together and share best practice as much as we can.</p> <p>The way Active Oxfordshire work is very clearly coordinated to enable a connected physical activity landscape across Oxfordshire. This is clear from how partners are brought together on projects in a joined up way. An example of this is Go Active Get Healthy a diabetes programme in all the districts but coordinated centrally by AO to ensure that changes in systems can be made. This approach is also clear in leadership forums and partnership meetings that bring a range of partners together to work on joined up physical activity provision and how to influence system change in Physical Activity along with always looking where gaps are and bringing in new partners that may not have been involved in physical activity before</p>	<b>11</b>

Shared work ethic, visions and hard working staff.																						
The staff, who are passionate, hard working and very skilled																						
Access to advice and support from staff																						
School games competition and opportunities given to the young students																						
Contacts. Networks.																						
Good communication with Josh and Hazel in particular - who have taken a real interest in Active Leaders and have supported our efforts to bring the leadership training opportunity to a wider audience																						
Understanding of the county landscape and networks surrounding key agenda items such as Healthy Place Shaping.																						
Communication and collaborative working, trying as much as possible to work together.																						
Local collaboraton with like minded people and them assing the messages on to our so valuable and receptive trainne teachers.																						
The fact that it brings all the SGO's together and help us work at getting more young people active.																						
Ability to listen, support and guide.																						
Like the senior team. Links with other parts of the community, especially local authorities																						
Increased awareness of the complexity of the PA offer to all Opportunity to participate and collaborate in the design of the project																						
Active Oxfordshire as a whole team and as individual team members are forward thinking and innovative - taking the initiative and making new connections have become hallmarks of how they operate.																						
common goal and hpefully resulting in funding for the pilot (and the long term implementation of an ex ref scheme county wide)																						
I value the sharing of information and support given to colleagues.																						
collaboration																						
The understanding, trust and added value that Cherwell DC have working in partnership with Active Oxfordshire to achieve common objectives and maximise the physical activity offer to local residents																						
sharing of ideas																						

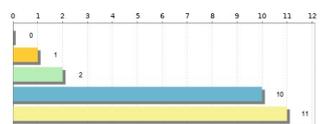

Statistics based on 19 respondents;

**Score Active Oxfordshire from 0-10 in terms of their skills, knowledge and understanding of your organisation and its priorities (where 10 is the best possible score)**
